

Dashboard Reporting in Modern Excel

Learn how to 'tame' your data and make it work for you in this **intensive** and **interactive** online workshop

With the huge amount of data available to us every day, a well-built and designed dashboard reports is one of the best ways to interpret and communicate large quantities of information. Learn how to synthesise information into a logical framework, summarise it into a meaningful format, and then display the summary into easy-to-read tables and graphs.

Harness the power of Modern Excel today.

**3 x 3-hour
Sessions
+ clinic**

**9th – 11th
June
2021**

Claim up to 3 CPD
hours per day

These courses build on students' **existing knowledge** of Excel tools and functions and incorporates these into complex and dynamic financial models and dashboards.

- *"Danielle really knows her stuff which she imparts calmly with humour...This was a really good course, impressive."*
Mat, Senior Accountant
- *"It was an outstanding course with relevant and dynamic content, tips and shortcuts to creating interesting and informative dashboards"* Jon, Pensions Actuary
- *"The course covered the latest Dashboard presentations, using Power BI and some of the latest Excel functions.... it was professionally run and interesting. Very hands on and I got a lot out of it."* Sam, Commercial Finance Business Partner
Dashboards in Modern Excel (online), June 2020

Delivery Format

This course is conducted as 3 x 3-hour live, online sessions on three consecutive days. At the conclusion of each formal session, a one-hour clinic is held where the instructor gives individual assistance and feedback. A download folder is provided, loaded with examples and templates.

At each step during the course, participants build and practice each formula, tool and technique and will build their own dashboards to take away for future use.

Includes 12 months access to session recordings

Course fees are AUD\$445 per head + GST
(approx. US\$320)
GST only applicable to Australian residents
